Notes:

The above prices reflect FAA minimum required hours of flight training. This is not a guarantee of completion or costs. Your actual costs will most likely be higher due to your individual skills, weather conditions, your choice of training aircraft, flying frequency, and/or additional special needs training. The national average for a private pilot certificate is 72 flight hours. Our average is 55-60 hours (see reverse side). You may wish to adjust the above figures accordingly.

Study materials must be purchased prior to flight training or ground school.

Prices do not include occasional fuel surcharges during volatile fuel pricing.

The Premier Flight Plan is a membership savings program purchased on an annual basis. Please see the separate information sheet for full benefits.

* Weight and balance limitations may require the use of a Cessna 172 at appx +\$40/hr. Prices effective August 15, 2018 and are subject to change without notice.
