

D095 . Minimum Equipment List (MEL) Authorization

HQ Control: 06/14/2013

HQ Revision: 02c

- a. The certificate holder is authorized to use an FAA-approved MEL provided the conditions and limitations of this paragraph are met. The certificate holder shall not use an MEL for any aircraft that is not specifically authorized by this paragraph.
- b. Authorized Aircraft. The certificate holder is authorized to use an FAA-approved MEL for the aircraft listed below:

Aircraft M/M/S	Limitations and Conditions
CE-172-N	Applicable to N738BU Ser.#17269856
CE-210-5(205)	Applicable to N1835Z Ser.# 205-0035

- c. Maximum Times Between Deferral and Repair. Except as provided in subparagraph e of this operations specification, the certificate holder shall have instrument and equipment items repaired within the time intervals specified for the repair categories listed below:

(1) Repair Category A. Items in this category shall be repaired within the time interval specified in the "Remarks or Exceptions" column of the certificate holder's FAA-approved MEL. For time intervals specified in "calendar days" or "flight days", the day the malfunction was recorded in the aircraft maintenance record/logbook is excluded. For all other time intervals (e.g., flights, flight legs, cycles, hours, etc.), repair tracking begins at the point when the malfunction is deferred in accordance with the certificate holder's FAA-approved MEL.

(2) Repair Category B. Items in this category shall be repaired within three (3) consecutive calendar days (72 hours) excluding the calendar day the malfunction was recorded in the aircraft maintenance log and/or record.

(3) Repair Category C. Items in this category shall be repaired within ten (10) consecutive calendar days (240 hours) excluding the calendar day the malfunction was recorded in the aircraft maintenance log and/or record.

(4) Repair Category D. Items in this category shall be repaired within one hundred twenty (120) consecutive calendar days (2,880 hours) excluding the day the malfunction was recorded in the aircraft maintenance log and/or record.

- d. MEL Management Program. The certificate holder shall develop and maintain a comprehensive program for managing the repair of instrument and equipment items listed in the FAA-approved MEL. The certificate holder shall include in a document or manual a description of the MEL management program. The MEL management program must include at least the following provisions:

(1) A method which provides for tracking the date and, when appropriate, the time an item was deferred and subsequently repaired. The method must include a supervisory review of:

- (a) The number of deferred items per aircraft; and

(b) Each deferred item to determine the reason for any delay in repair, length of delay, and the estimated date the item will be repaired.

(2) A plan for bringing together parts, maintenance personnel, and aircraft at a specific time and place for repair.

(3) A review of items deferred because of the unavailability of parts to ensure that a valid back order exists with a firm delivery date.

(4) A description of specific duties and responsibilities, by job title, of the personnel who manage the MEL management program.

(5) Procedures for controlling an extension to specified repair intervals as permitted by subparagraph e of this operations specification, to include the limit of the extension and the procedures to be used for authorizing an extension.

e. Continuing Authorization-Single Extension. The certificate holder is authorized to use a continuing authorization-single extension to approve a single, one-time extension to the repair interval for repair category B and C items, as specified in the FAA-approved MEL, provided the responsible Flight Standards District Office (FSDO) is notified within 24 hours of the extension approval.

(1) If an additional extension is required after the continuing authorization-single extension privilege has been exercised, it must be approved by the principal inspectors (PIs) prior to the expiration of the current extension time period.

(2) The certificate holder is not authorized to approve a single, one-time extension to the repair interval for repair category A and D items, as specified in the FAA-approved MEL.

(3) The FSDO may deny the use of the continuing authorization-single extension privilege if abuse is evident.

1. Issued by the Federal Aviation Administration.
2. These Operations Specifications are approved by direction of the Administrator.

Digitally signed by William D. Shinn, Principal Maintenance Inspector (NM01)
